### CHANGE COURT TERM

Chief Justice Frear in his annual re

I recommend that instead of holding four terms of three weeks each of the Supreme Court yearly, only one term of indefinite duration be held-to be gin, say, on the first Monday in October or perhaps a little earlier. This would make it possible for the court to sit during a short period at such intervals as should appear best, as for instance during a portion of each month, until. the following summer, and then adjourn for the warm months, as is the practice in some other jurisdictions Among the advantages of this plan are the following, bearing in mind that it now generally takes the entire term of three weeks to hear all the cases on the calendar and that the court does not sit again for three months. (1) This would enable the court to both hear and decide cases more speedily after appeals are taken At present, if a case is appealed just after a term, it is not heard until the next term and then may not be decided until near the following term, owing to the large number of other cases to be decided. Under the proposed plan a case may be heard a few weeks at most after an appeal is taken and may be decided within a few weeks more on account of the small number of cases submitted at one time. (2) It sometimes hap ens that a member of the court is ill or absent during an entire term of three weeks. It is then necessary to call in Circuit Judges and members of the bar in all cases heard at the term. This is very unsatisfactory to both the bench and bar. Under the proposed plan, if a member of the court were ill or absent for 2 few weeks, substitutes would have to be called in for a few cases only. (3) If for any reason a case should be con-tinued it would not be necessary to continue it until the next term. It could be continued for a short period.

#### Rapid Transit Extensions.

The trustees of Oahu College have made the Rapid Transit and Land Company an offer of a bonus of \$25. 000 for the extension of their electric railway from its intersection of Puna hou street to the College Hills tract The matter is now in the hands of a committee, which will report to the directors of the Rapid Transit Co.

The officers of the street railway company and the members of the negotiating committee refused to make any statement for publication further than that at present there has been no deal consummated. The negotiations have been in progress for some time.

#### Rosamond Sailed Alone,

There was no race today between th Rosamond and Olympic to see which vessel would go to sea first. This is the first time in many sailings that the Rosamond has not left Honolulu in company with the bark and Captain Ward of the schooner will not be kept on the anxious seat this time for fear of the Olympic beating him to San Francisco as she has done heretofore every time they have left together. Captain Offis of the Olympic hopes to be in company with his rival again in about two months.

## 'Straight Fronts'

The last and most perfect achievement of the "Sonnette" corset makers is the "Straight Front Corset M litant" It is so simple in design and construction that it needs but a word of description. The secret of it all lies in substituting for gores, transverse seams in graceful curves, which adapt themselves to all figures, thus securing the most comfortable and perfect fit. It is made in three or four pieces which, being cut on correct geometrical principles with transverse seams running round the body instead of up and down, evade all strain; thus avoiding the objections urged against every other corset. The fit is perfect, for it is automatic, or self-adjusting, yielding so easily to every movement that the wearer is unconscious of any feeling of constraint, an important feature in this climate.

It, as the name implies, produces the fashionable effect upon figure. The wearer at once, and of necessity, assumes the "military" position. The bust is allowed to fall, all pressure is removed from the diaphragm and applied to the abdomen and the new position is far more graceful and conducive to health

These corsets may be seen in our store in several qualities. We shall be glad to show them, and no one need feel obliged to buy them because we have had the privilege of showing them.
